

Selectable Lightweight Attack Munition (SLAM)

MISSION

Defeat vehicles and light armored targets.

DESCRIPTION AND SPECIFICATIONS

The Selectable Lightweight Attack Munition (SLAM) is an Army war reserve modernization munition. It is a lightweight (2.2 lb), hand-emplaced munition that offers the user multiple modes of operation. SLAM can engage and defeat targets up to 25 feet from detonation.

It can be used for bottom attack (magnetic signature), side/top attack (infrared signature), timed demolition, or by operator-initiated command detonation.

FOREIGN COUNTERPART

No known foreign counterpart

FOREIGN MILITARY SALES

None

PROGRAM STATUS

First Army production quantity of SLAM funded in FY97.

PROJECTED ACTIVITIES

A production build readiness review will be conducted by the prime contractor on the explosive train, prior to production start-up, which is slated for mid-FY00.

PRIME CONTRACTORS

Alliant Techsystems (Minneapolis, MN)
